To Whom It May Concern:

Mike Conkright is currently our pest controller at Suspa, Inc. Before Professional Pest Management was hired, we had this business sourced with a well-known National firm and we were not pleased with their service. Since Mike has taken over this area, we no longer have any pests! We have never had this kind of success with our prior pest contractor.

We are thoroughly pleased with Professional Pest Management. We are confident that he has handled the job and we are impressed with his business values. PPM now handles our pest control inside and outside of our facilities. I would recommend Professional Pest Management to all that need some type of pest control.

Please feel free to contact us with any questions you may have.

Most sincerely,

SUSPA, Inc.
